

# V2100

## COMPACT DESIGN FLEXIBLE FEATURES

It can be challenging to fit an advanced wheel aligner into a shop with a compact footprint, but the John Bean® V2100 is up for the task.

We've packaged the V2100 to take up minimal room in your shop, with a console-integrated post and beam design. Use your tablet as a wireless secondary display for the ultimate flexibility and ease of use.

V2100 can be easily updated via a network connection, ensuring the most up-to-date information is always readily available at your fingertips.

Combine these features with our advanced software that includes fast compensation and optimised alignment flow, and you have the ultimate solution for independent shops looking to take advantage of lucrative alignment services.

Be EQUIPT

## TILT BEAM IMAGING WHEEL ALIGNMENT SYSTEM

### FAST COMPENSATION AND OPTIMISED ALIGNMENT FLOW

Enhance productivity and cut down on unnecessary steps with an intelligent, predictive alignment workflow that simplifies the alignment process.

### ADVANCED NOTIFICATION SYSTEM

The advanced notification system provides critical information without slowing down the alignment process, automatically detecting and compensating suspension stress issues or environmental errors, only notifying the technician when necessary to provide additional information for corrective action.

### REMOTE CONTROLLED TILT BEAM

A simple remote control allows technicians to tilt the beam quickly and easily.

### VODI™

Our exclusive Vehicle Orientation Directional Indicator (VODI™) guides technicians through the measurement process when the monitor is not in view, with simple, easy-to-follow red and green LED lighting, reducing the amount of time spent walking back and forth from the vehicle to the aligner.

**WHEN GOOD ENOUGH ISN'T ENOUGH, JB.**

# V2100

## XD CAMERA TECHNOLOGY

Video speed cameras constantly monitor the alignment and immediately detect common environmental conditions or vehicle problems that can cause maladjustments.

## SMALL FOOTPRINT

Maximise shop floor space with a simple and easy-to-install design.

## AC100 CLAMPS

Fast and easy to use with self-centring design, two-sided claws provide reliable clamping, even over hub caps.

## TECHNICAL SPECIFICATIONS
