

T8056

OPTIMUM SAFETY MAXIMUM PRODUCTIVITY

True, one-operator capability makes the John Bean® T8056 the productivity workhorse you need if you regularly work on heavy-duty tubeless, tube type, single or multi-piece, Budd, and Dayton wheels.

Utilising a remote-control console, the T8056 allows a single technician to work on tyres and OTR wheel assemblies up to 92.5 inches in maximum diameter; clamping wheels of 32 inches diameter (or 56 with optional extensions), safely and easily. The two-speed, self-centring, four-jaw, hydraulically operated chuck grips wheels with authority.

We've designed the T8056 with an all-in-one bead breaker, mount/demount head assembly that makes quick work of even the toughest tyres. For heavy-duty wheels and tyres this is the ultimate in productivity, safety, and precision.

Be FAST

HEAVY-DUTY TYRE CHANGER

MOBILE CONTROL UNIT

Wired remote control console allows one technician to safely monitor all tyre changing operations.

NON-RETURN VALVE

A non-return safety valve prevents the chuck from opening in case of a sudden hydraulic pressure drop.

BEAD BREAKER

The bead breaker disk is equipped with a special tilting system to assist bead breaking and ensure the disk is in the optimum position.

CHUCK

The chuck is of solid design to accommodate wheels of up to 3,300 pounds (1,500 kg).

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.
