

# SYSTEM IV-E

## IDEAL SETUP QUALITY OUTPUT

The John Bean® System IV traditional tilt-tower design combined with a handy two-speed turntable and a bevy of productivity-boosting features allows you to keep revenue-boosting tire services where they belong - in your shop.

An on-floor bead breaker with an ergonomically located pedal makes breaking even the toughest beads easy and safe. The pneumatic locking tilt-tower configuration easily moves out of the way to ergonomically allow placement of small to large wheels. Once the tire is on the turntable, the self-adjusting four-jaw clamp secures the wheel with twin-cylinder clamping power, and the integrated tire pressure limiter eliminates the possibility of over-inflation.

Big features, smaller price; the System IV is a great addition to any medium to high-volume shop.

**Be EQUIPT**

## TILT-TOWER TIRE CHANGER

### TILT-TOWER

The pneumatic Tilt-Tower post provides maximum clearance for installing the tire on the turntable.

### ON-FLOOR BEAD BREAKER (PEDAL-OPERATED)

Traditional side-shovel bead breaker with ergonomic pedal-control positioned away from the shovel; the fastest solution for standard, soft sidewall, and high-aspect tires.

### TABLETOP BEAD SEATER

A direct burst of compressed air comes through the clamping jaws to facilitate bead seating.

### ADJUSTABLE CLAMPING JAWS

Self-centering nylon-covered clamping jaws protect the wheel and provide a secure grip.

**WHEN GOOD ENOUGH ISN'T ENOUGH, JB.**
