

T8058

PARAMOUNT FEATURES SUPERIOR RESULTS

Heavy-duty vehicles have heavy-duty tires and OTR wheels that can be a challenge to work on without the right machine. The John Bean® T8058 is the pinnacle in heavy-duty tire changing technology and can support wheel assemblies up to 92 inches in maximum diameter; clamping wheels of 58 inches diameter without extension. Powerful hydraulic cylinders drive the mounting tool and the bead breaker.

In order to work on wheels without tires, the self-centering, four-jaw, two-speed chuck can easily be dropped to only 13.78 inches below the carriage. Positioning and rotation of the mounting tool are handled independently and move with ease using hydraulic power.

For the most challenging applications that require precision, the John Bean T8058 has you covered.

Be **PRECISE**

HEAVY-DUTY TIRE CHANGER

MOBILE CONTROL UNIT

Wired remote control console allows one technician to safely monitor all tire changing operations.

EXTREMELY WIDE CLAMPING RANGE

Clamping range for rims of 14" to 58" without extensions; long jaws accommodate rims of high offset.

ADJUSTABLE MOUNTING TOOL

The adjustable mount/demount with bead-breaker disk and lever tool rotates 180 degrees to work on both sides of the tire.

PRESET TOOL CARRIAGE

The mount/demount tool travels from right to left of the tire for bead-breaking and mount/demount operation.

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.
