V2105

COMPACT DESIGN FLEXIBLE FEATURES

Small in size but not in features, the John Bean® V2105 offers a host of productivity-focused features with a minimal footprint and easy installation options.

We've packaged the V2105 to take up minimal room in your shop, with a console-integrated post and beam design. Use your tablet as a wireless secondary display for the ultimate flexibility and ease of use. V2105 can be easily updated via a network connection, ensuring the most up-to-date information is always readily available at your fingertips.

Combine these features with our advanced software that includes fast compensation and optimized alignment flow, and you have the ultimate solution for independent shops looking to take advantage of lucrative alignment services.

TILT BEAM IMAGING WHEEL ALIGNMENT SYSTEM

FAST COMPENSATION AND OPTIMIZED ALIGNMENT FLOW

Enhance productivity and cut down on unnecessary steps with an intelligent, predictive alignment workflow that simplifies the alignment process.

ADVANCED NOTIFICATION SYSTEM

The advanced notification system provides critical information without slowing down the alignment process, automatically detecting and compensating suspension stress issues or environmental errors, only notifying the technician when necessary to provide additional information for corrective action.

EZ-TOE

Our advanced software makes it easy to quickly and accurately measure toe angle, allowing technicians to turn the wheel to access challenging adjustment points without using a steering wheel holder.

RESET PROCEDURES

The system's online connectivity allows for software and vehicle specification database updates in order for your shop to support the latest in alignment specs, aftermarket parts replacement, and steering angle reset procedures.

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.

CONVENIENT SYSTEM COMPREHENSIVE SERVICE

Be EQUIPT

REMOTE CONTROLLED TILT BEAM

A simple remote control allows technicians to tilt the beam quickly and easily.

VODI™

Our exclusive Vehicle Orientation Directional Indicator (VODI) guides technicians through the measurement process when the monitor is not in view, with simple, easy-to-follow red and green LED lighting; reducing the amount of time spent walking back and forth from the vehicle to the aligner.

XD CAMERA TECHNOLOGY

Video speed cameras constantly monitor the alignment and immediately detect common environmental conditions or vehicle problems that can cause maladjustments.

AC100 WHEEL CLAMPS

Fast and easy to use with self-centering design, two-sided claws provide reliable clamping, even over hub caps.

SMALL FOOTPRINT

Maximize shop floor space with a small console that takes up minimal shop space with easy storage for the targets.

CLOUD SERVICES PRINTING

Easily share service reports with your customers via email or print from anywhere in the shop.

RIDE HEIGHT

Eliminate manual data entry, speed up measuring, and increase accuracy using our specially designed, optional Ride Height Targets.

TABLET SECONDARY DISPLAY OPTION

Use a compatible tablet to perform the alignment process for even more flexibility during core alignment procedures.
