EZ-ADAS RECALIBRATION SYSTEM

SAVE TIME ■ SAVE SPACE ■ WORK PRECISELY

Don't be left behind, Advanced Driver Assistance Systems (ADAS) commonly referred to as drivers' aids or safety systems, are not coming, they are already here.

ADAS creates new challenges for repair shops of all kinds. Even seemingly simple repairs can result in the need for sensor recalibration. We can make it easier for you.

EZ-ADAS Recalibration System is an innovative collection of precision tools with leading-edge design.

The system features a unique, fast and precise centerline setup, based on OEM procedures, for easy operation.

Intuitive laser-guided target placement ensures accurate, error-free positioning and increases productivity.

EZ-ADAS integrates with a shop's processes, working with most of the existing alignment equipment and diagnostic scan tools with ADAS coverage.

WE MAKE IT EASIER

Our simple three-part system is fast to set up. It is fully mobile and folds when not in use, reducing the space needed for storage.

WE ARE ACCURATE

Our high accuracy laser positioning system, combined with our unique target placement, allows any technician to quickly position the target in the OEM required location.

It is simple to use and requires minimal training.

ADAS SYSTEMS**

WE FOLLOW OEM PROCEDURES

We've taken the time to understand the OEM procedures so you don't have to.

Our target placement guide uses clear, easy steps directly identified from the OEM of the vehicle you are repairing, eliminating uncertainty.

Many OEMs require vehicles to be in proper wheel alignment before ADAS recalibration. For added confidence, pair the EZ-ADAS system with a John Bean® or Hofmann® audit alignment check to validate OEM specifications and have automatic access to target placement instructions.
