## WIRELESS DRIVE-THROUGH WHEEL ALIGNMENT SYSTEM

If you're looking for the ultimate in precision with a high degree of mobility and installation flexibility, look no further than the John Bean® V3400 wheel alignment machine.

The V3400 utilizes a drive-through design with fully wireless Bluetooth® connected camera towers for easy installation in various bay types, especially when paired with the optional mobility kit.

Automatic camera tracking eliminates the need to readjust the camera after raising the lift, while a continuously calibrating third camera retains ultimate accuracy. Touchless AC400 clamps accommodate a full range of tire sizes and ensure a safe, damage-free attachment without touching the rim while applying limited clamping force. Each step in the alignment procedure has been carefully designed to provide the ultimate precision for every adjustment. Our advanced software features enable technicians to perform specialized vehicle measurements such as scrub radius, caster trail, pro-Ackerman, and more, making the V3400 ideal for top-tier precision and convenience in wheel alignment.

\* U.S. OEM only

## KEY FEATURES

### Drive-Through Design

The dual-tower design can accommodate larger-width vehicles by allowing the technician to position the towers apart at optimal distances. This also leaves space at the front of the vehicle to perform other tasks such as ADAS recalibration.

### Mobility Kit

The optional mobility kit allows for easy relocation of the XD camera alignment towers within the shop, giving the ability to move between bays or out of the way, as needed.

### OEM Procedures

The software provides the recommended procedures defined by the manufacturer and indicates the correct clamps for an accurate OEM-specified wheel alignment.

### Automatic Camera Tracking

Cameras move automatically up and down following the targets, eliminating manual adjustments of the camera beam.

## TECHNICAL SPECIFICATIONS

<b>Tire Diameter (AC400)</b>	19"-39"   48-99cm
<b>Wheel Diameter (AC200)</b>	12"-24"   30-61cm
<b>Track Width</b>	48"-96"   122-244cm
<b>Wheelbase</b>	79"-180"   201-457cm
<b>Power Supply</b>	110-240V 50/60Hz
